

D.W. Electrical

ENVIRONMENTAL POLICY

D W Electrical recognises that, in the pursuance of business objectives, it has a responsibility to protect and sustain the environment. By exercising adequate controls over its activities *D W Electrical* will promote the use of sustainable resources and discourage wasteful or damaging practices. Environmental responsibility means first that our actions should comply with relevant legislation.

In all of its activities *D W Electrical* will aim to:-

- Protect, and where possible, enhance the natural environment
- Promote the reduction of the unnecessary use of natural resources within *D W Electrical*
- Minimise the creation of waste through our own activities and being environmentally conscious when purchasing equipment and materials
- Minimise pollution created through our company's activities and endeavour to reduce air, water, land, light and noise pollution
- Promote the importance to all employees of reducing, reusing and recycling waste produced by *D W Electrical*
- Ensure all employees are trained in environmental issues including how to reduce pollution; how to minimise waste; and how they can help to protect the environment in their day to day jobs

D W Electrical encourages everyone from engineers to managers, administrators to directors, to act in a way which will enhance rather than harm the environment and will gladly receive any practical suggestions about ways in which our performance can be improved.
